

COMPANY PRESENTATION

ŠIMŮNEK, S.R.O.

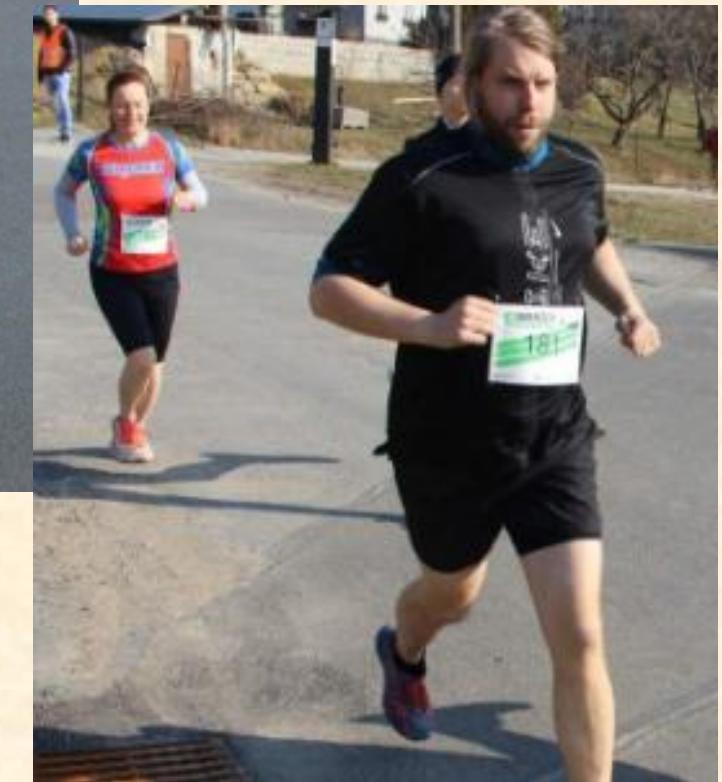

I. HISTORY

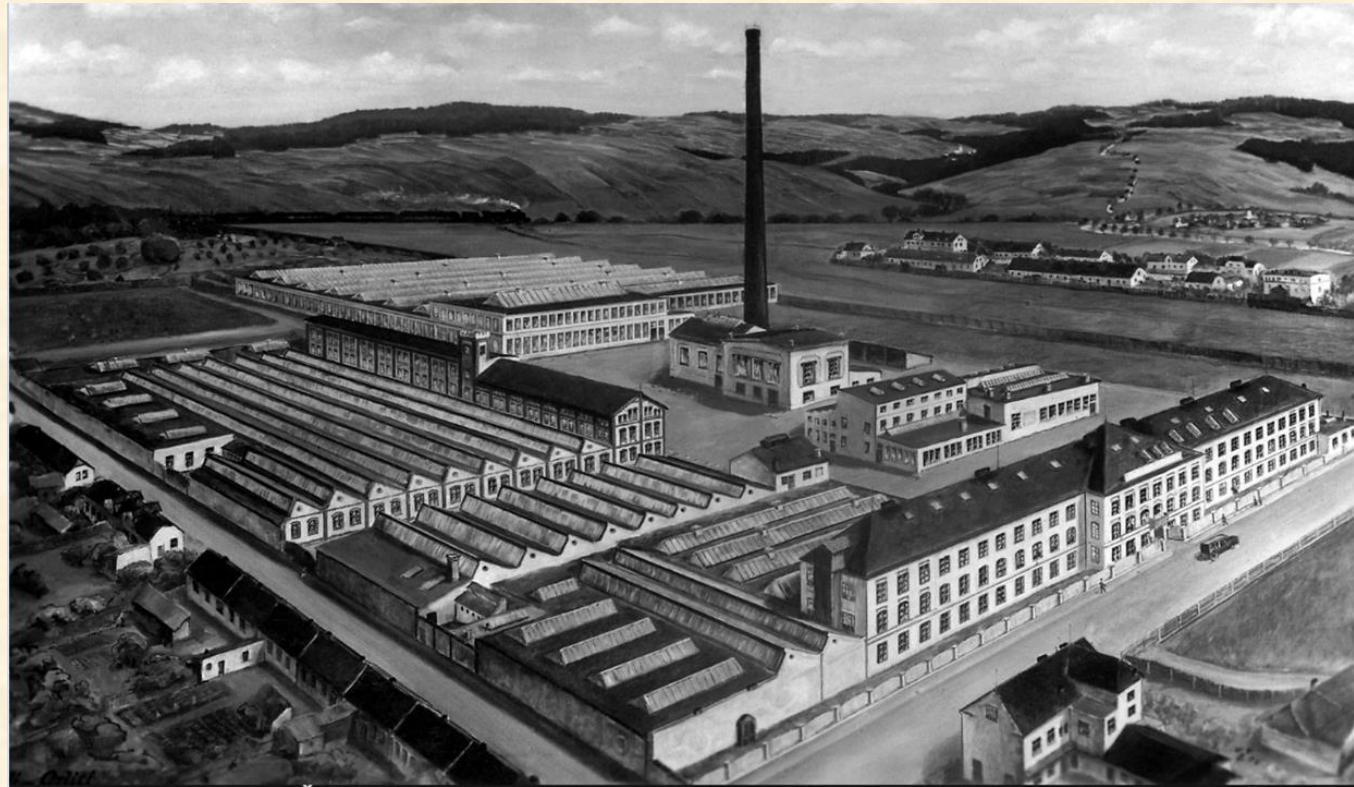

I. HISTORY

I. HISTORY – THE BEGGINING 2007

I. HISTORY – LEGACY

■ Firma Pollak, 1901

I. HISTORY – LEGACY

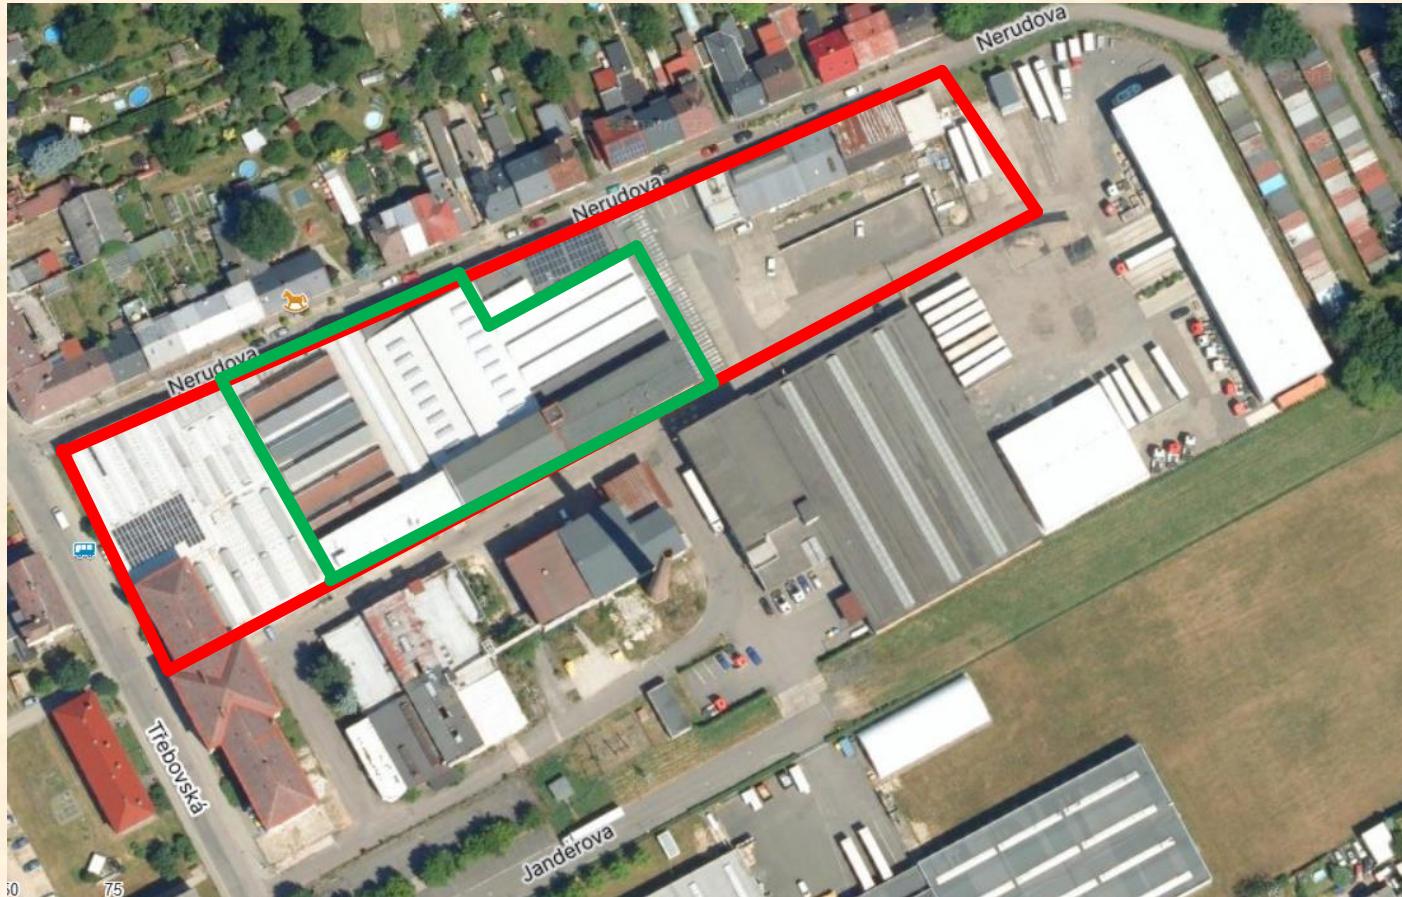

- Firma POLLAK, 1926

I. HISTORY – NEW BEGGINING 2012

■ Areál PERLA, 2006

I. HISTORY – LEGACY

- Firma Šimůnek, s.r.o., 2024

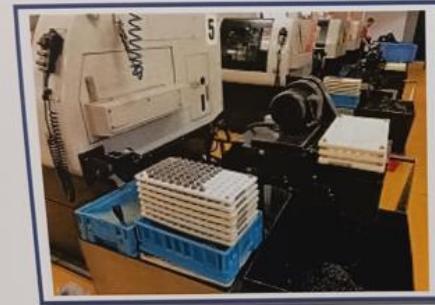

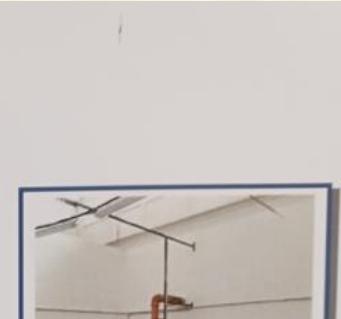

I. HISTORY – THE NEW BEGGINING 2012 / HARD WORK

I. HISTORY – THE NEW BEGGINING 2012 / HARD WORK

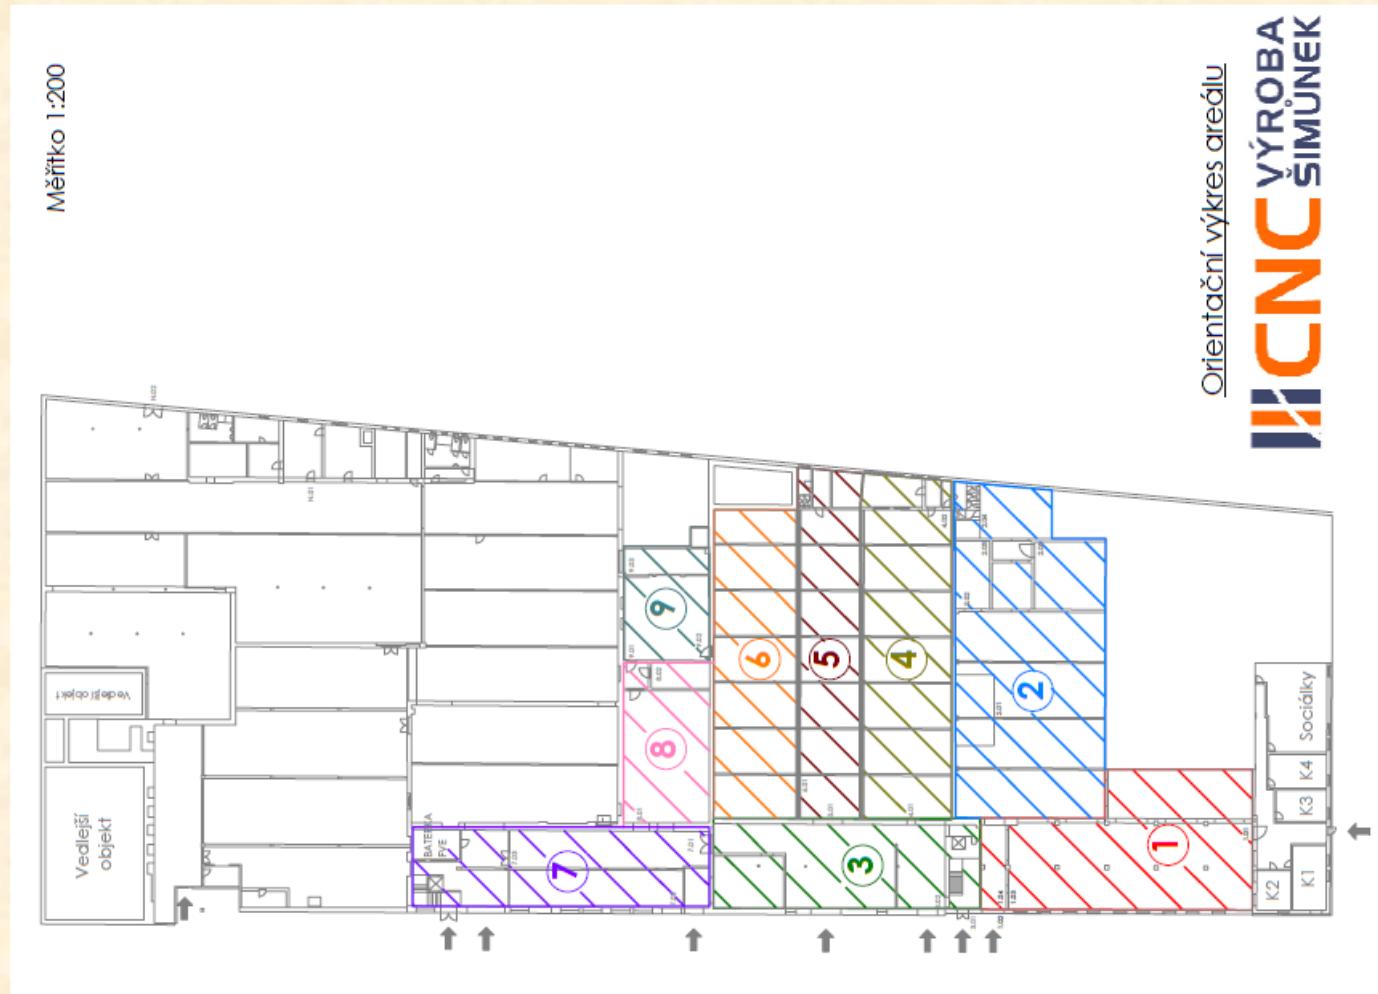

I. HISTORY – THE NEW BEGGINING 2014

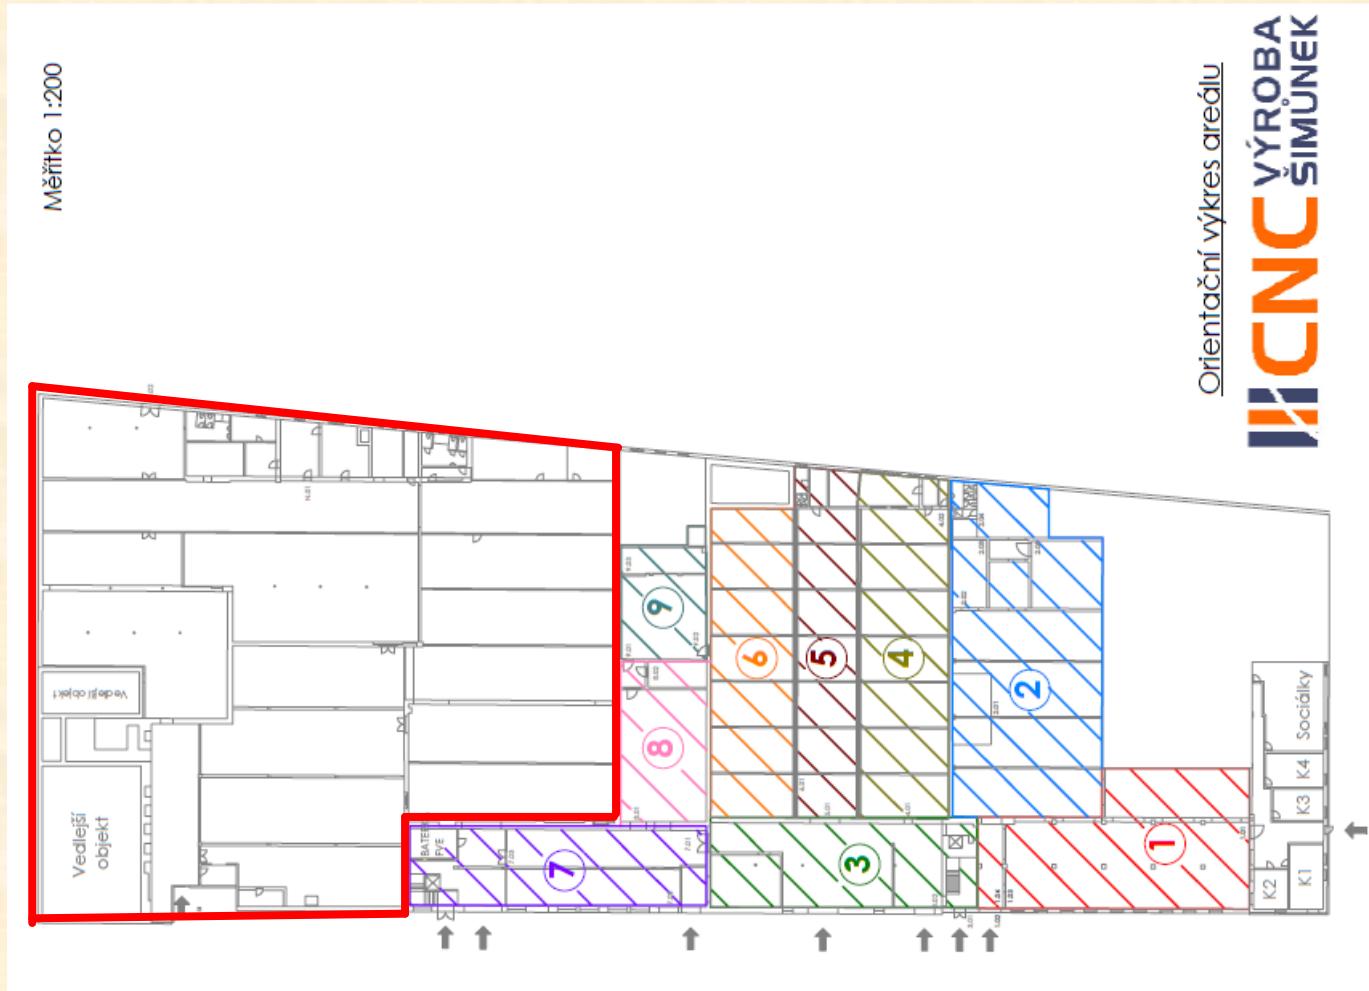

I. HISTORY – TILL TODAY

I. HISTORY – TILL TODAY

I. HISTORY/FUTURE

6200 m² ready to be used !!

Nearest future:

- 1) Reconstruction of usable area (roofs, floors, heating)
- 2) Reconstruction of second floor (dining hall, offices)
- 3) Investment into new machines:
 - 3.1) speed swiss type turning machines for brass
 - 3.2) more spindle turning machine
 - 3.3) 5 - axis high speed milling machine

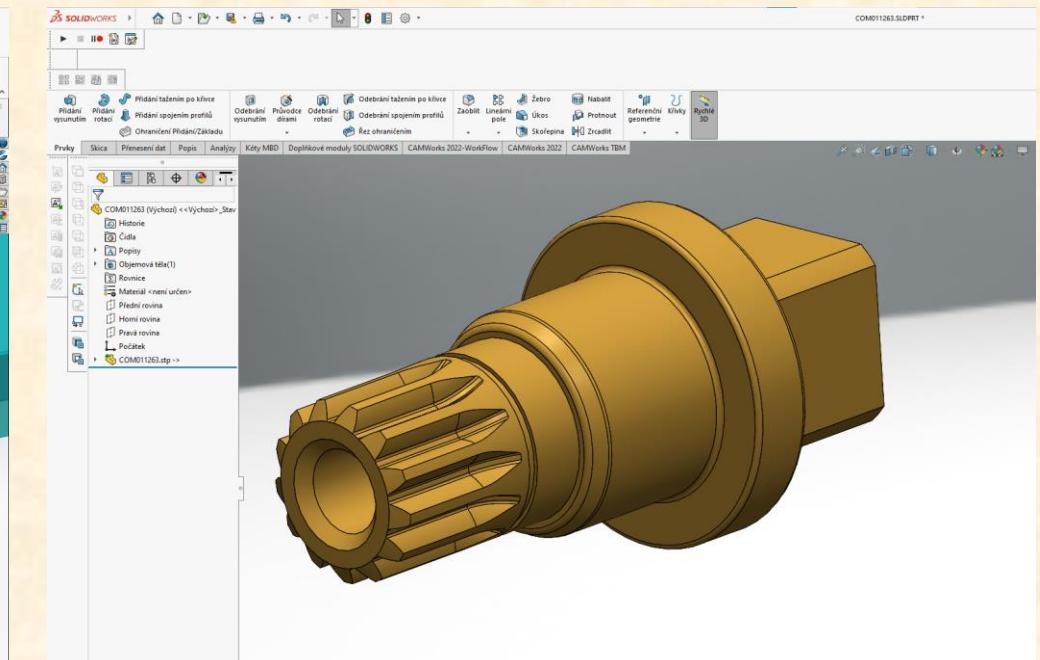

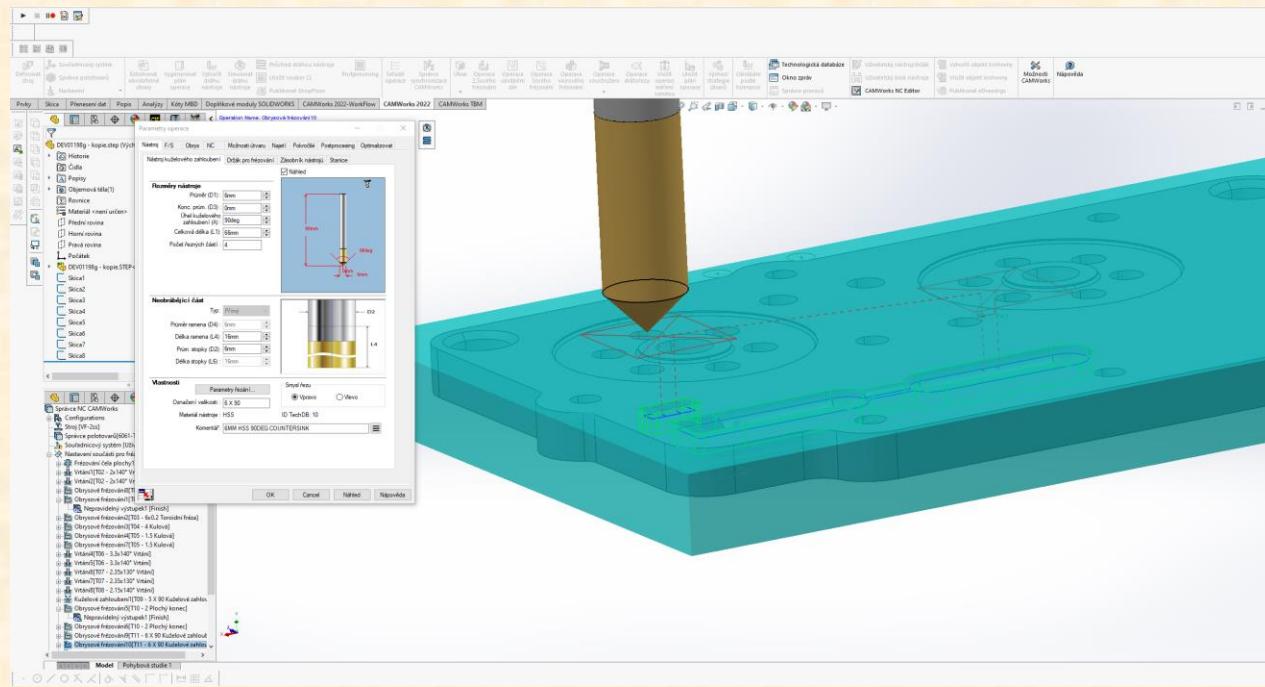

II. WHAT WE OFFER

- Primarily we specialize in small and medium-sized serial production of precision parts according to customer project documentation mostly from steel, stainless steel, brass and aluminium alloys
- We are small dynamic company with possibility of grow in our own place of 4000m², using modern ERP system and production technologies
- Our satisfied customers are OEM companies producing:
 - Gas control equipments
 - Hydraulic systems
 - Industrial valves
 - Pressure vessels
 - Firefighting equipments
 - Tooling systems

III. TECHNOLOGICAL CAPABILITIES

III.1) CAD, CAM software

- We use 3 CAD SOLIDWORKS licences and 2 CAM licences for technological preparation of production

III. TECHNOLOGICAL CAPABILITIES

- **III.2) Turning**
- **III.2.1) Multi - spindle Swiss type machines with feeder for 3m bars**

- **4x JSL 20 CNC machines, maximum turning diameter 20mm**

technical data: <https://www.stcom.cz/cs/prodej-stroju/dlouhotocne-automaty/jsl-20ab>

- **7x JSL 32 CNC 32 machines, maximum turning diameter 32 mm**

technical data: <https://www.stcom.cz/cs/prodej-stroju/dlouhotocne-automaty/26ab-32ab-42ab>

- **2x JSL 42 machines, maximum turning diameter 42 mm**

technical data: <https://www.stcom.cz/cs/prodej-stroju/dlouhotocne-automaty/jsl-42aby>

III. TECHNOLOGICAL CAPABILITIES

III.2.1) Multi - spindle Swiss type machines with feeder for 3m bars

III. TECHNOLOGICAL CAPABILITIES

- **III.2) Turning**
- **III.2.2) CNC lathes with live tools and Y-axis, with feeder for 1m bars**
 - **1x MORI SEIKI NL 2500SY/700,**
 - maximum turning diameter 356mm,
 - maximum length 700mm,
 - maximum rod diameter through the spindle 75 mm
 - **1x MORI SEIKI NL 2500MC/700,**
 - maximum turning diameter 356mm,
 - maximum length 700mm,
 - maximum rod diameter through the spindle 75 mm

III. TECHNOLOGICAL CAPABILITIES

- III.2) Turning
 - III.2.3) CNC lathe with driven tools and Y axis with feeder for 3m bars
 - 1x CNC two turret lathe NAKAMURA WY - 100 II

maximum machining diameter 175 mm,

maximum rod diameter through the spindle 42 mm

technical data:

<https://www.haascnc.com/cs/machines/vertical-mills/vf-series/models/small/vf-2ss.html>

III. TECHNOLOGICAL CAPABILITIES

■ III.4) Milling

- 1 CNC milling machine HAAS VF 2 SS
 - X, Y, Z travels : 762mm, 406mm, 508mm

technical data:

<https://www.haascnc.com/cs/machines/vertical-mills/vf-series/models/small/vf-2ss.htm>

III. TECHNOLOGICAL CAPABILITIES

■ III.5) Milling

- 1 CNC milling 5 – axis machine DMC 75 MonoBlock + interpolation turning option

X, Y, Z travels : 750mm, 650mm, 560mm

Max. workpiece dia. 840 mm // 600 kg

technical data:

<https://cz.dmgmori.com/produkty/stroje/frezovani/petiose-frezovani/monoblock/dmu-75-monoblock-2nd>

III. TECHNOLOGICAL CAPABILITIES

■ III.6) Cleaning technologies

- 1x drum cleaning machine SUMMA 600

technical data:

https://www.summa.cz/wp-content/uploads/2020/03/WIR_4H_cz_ru_en.pdf

- 1x ultrasound cleaning machine KRAINTEK

technical data:

<https://www.kraintek.cz/ultrazvukove-linky-kompaktni-s-otacenim-kosu>

III. TECHNOLOGICAL CAPABILITIES

- III.7) Marking technology
 - 1x CNC marking station Laser VMK

III. TECHNOLOGICAL CAPABILITIES

- III.8) Assembly
 - station for small mechanical assembly groups

III. TECHNOLOGICAL CAPABILITIES

■ III.9) Control

- equipment for final and interoperational control
- 1x 3D measuring station ZEISS INSPECT
- 2x optical measuring station INSIZE
- many different digital nad mechanical measuring gauges

III. TECHNOLOGICAL CAPABILITIES

- III.9) Control - photos

III. TECHNOLOGICAL CAPABILITIES

- **III.10) Storage of the parts**
 - suitable space for all parts storage of our customers
 - We deliver just in time in requested amount and package

III. TECHNOLOGICAL CAPABILITIES

- **III.11) Surface threatement, Thermal threatement**
 - We dispose of many agreed suppliers of several surface and thermal threatements requested by our customers
